Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a device for displaying, classified in class 40, subclass 606.01.
 - II. Claims 18-22, drawn to method of making a display device, classified in class 156, subclass ***.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claim can be made by another process such extruding a sheet having a first and second layer, die cutting the sheet, providing a hanger for supporting the device.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Richard Mescher on June 24, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 2, 3, 6, 7, 8, 9, 12-14, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liu, US 20030051378A1 in view of Snidermann, US006265035B1. Liu teaches a card comprising a plate member 1, and adhesive layer 122 and picture 12 adhered to the both sides of the plate member using the adhesive layer. Snidermann teaches a ornament comprising a plate and a swivel hook for attaching the plate to a Christmas tree (support member). It would have been obvious to one having ordinary skill in the art at the time this invention was made to support the card taught by Liu upon a Christmas tree as taught by Snidermann to provide a means to enhance the aesthetic appearance of the tree.

Allowable Subject Matter

7. Claims 4, 5, 10, 11, 15, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
